

Fresnel

Smart Pendant

Inspired by 'the invention that saved a million ships', the Fresnel smart pendant light elevates the optical lighthouse lens to a celebration of urban industrial style. Tiered concentric rings of glass create a prismatic display of contoured light that brings a fresh look to modern interiors.

Each 12" diameter globe pendant light is individually hand blown in our Salt Lake City glass studio from 7 pounds of lead-free crystal glass. Smart LED lighting technology gives you complete control of your color and brightness settings throughout the day.
